The Labs for Math 256 should include (but are not limited to) sections of the following types:

1. Purpose, Hypotheses, Assumptions

2. Notation (variables and parameters) and Model (the differential equation)

3. Procedure (data collection information)

4. Data Charts

5. Discussion (answer the questions from the handout & discuss limitations/improvements in the model).

6. Conclusion (relate results back to hypothesis, suggest possible areas of error or inaccuracy, suggest ways to improve the model and /or lab)
