Part Two presents a cursory description of the specific format used in Worlds-Style Debate. To accomplish that interplay between reading the textbook information and performing debates, students should begin immediately to discuss the topics from the textbook with their debate colleagues while also participating in debate tournaments. Chapter 5 explains the format of Worlds-Style Debate, providing information such as how many debaters serve on a team, how many teams engage the debate, the order in which speakers present, how speeches are timed, and so on. Chapters 6 and 7 explain how to construct arguments, first for the First Government Team and then for the First Opposition Team. Chapters 8 and 9 cover Member Speeches and Whip Speeches. Even as students are completing Part Two, they may wish to attend tournaments where they will begin to apply the concepts they have studied.
