Faced with increasing use of personal devices for presentations in Willamette classrooms and with the elimination of VGA display outputs from those devices, WITS generated a list of candidate classrooms that would benefit from upgrades that would provide HDMI video output to the data projectors installed in the classrooms. ATAC determined that HDMI upgrades would take precedence for the Summer 2016 installation schedule and selected 10 classrooms for upgrades:

- Collins: 205, 210, 324 & 407T
- Ford: 102 (front outputs only), 204 & 304
- Law: 217 (pending response from Law)
- Mudd: 201
- Pelton: 202
