CLASS ASSIGNMENTS

The text for this course is:

There is also a separate supplement or “appendix” to the textbook with selections from Article 2 of the Uniform Commercial Code (“UCC”), the Restatements of Contracts, and other materials. *Any edition of this supplement will suffice.*

I also recommend Robert A. Hillman’s *Principles of Contract Law*, Thomson West, or M. Chirelstein's *Concepts and Case Analysis in the Law of Contracts*, Foundation Press. I did not have the bookstore order them, but they should be readily available at your favorite on-line bookstore.

The following treatises on Contracts are useful resources in the library for your reference:

- Farnsworth on Contracts
- White and Summers on the Uniform Commercial Code
- Corbin on Contracts
- Williston on Contracts

The assignments are numbered below by class. *Each assignment is tentative*, and may be changed by prior announcement in class. You should see these assignments as merely a rough approximation to be clarified later.
