## **EDITOR'S NOTE**

The Editorial Team is proud to present the seventh issue of the WILLAMETTE UNIVERSITY ENVIRONMENTAL LAW JOURNAL. We want to thank the authors, subscribers, and editorial staff members for their steadfast dedication to expanding knowledge and inspiring globally-minded discourse within the field of environmental and natural resources law. United by the topic of domestic water law, both articles in this issue offer innovative solutions to address contemporary problems related to water supply and water pollution, respectively. We hope that our readers find this issue a valuable legal resource.
