Homework Assignments
Math 141 – Calculus 1
Fall 2007

All homework is due at 4:30 PM on the day indicated. You should look at and work on all of the homework problems, however, only the underlined ones will be graded and commented on. The homework is meant to deepen your understanding of the course material. If you feel that you understand a non-underlined problem already, feel free to move on to the next one. By contrast, if you are stuck on any problem, even one I have not assigned, please ask about it during my office hours. On all problems, you are encouraged to use technology when you feel it is appropriate.
