

**Math 300 – Geometry**  
**Block 2 2004**  
**Course Procedures**

**Professor:** Josh Laison, Tutt 201, x6544, [jlaison@coloradocollege.edu](mailto:jlaison@coloradocollege.edu)

**Class Meetings:** 10:00-11:30 and 1:00-2:30, Monday–Thursday,  
10:00-11:30 and 1:00-2:00 Friday, Tutt 122

**Textbook:** A Course in Modern Geometries, Judith N. Cederberg

**Course Web Page:** <http://faculty1.coloradocollege.edu/~jlaison/geometry.htm>

**Grading:**

Written problems	30%
Class attendance and participation	50%
Final exam	20%

**Homework Problems:** You will have written homework due approximately every day, but you will generally have around two days to turn each assignment in. We will spend some class time working on the homework problems. You should work together as a class on the homework problems, and turn in *only one homework assignment* for the class. I will assign the same homework grade for all members of the class. Please distribute homework evenly among class members, and share in the writing.

**Attendance and Class Participation:** In-class activities will be a large component of the course, and the portion of your grade for attendance and class participation is correspondingly high. The class will cease to function if any class member is absent or disengaged. Please support your classmate(s) by coming to class every day prepared.

**The Final Exam:** The final exam will be an oral exam on the last day of class. Each student will schedule their exam individually. The exam should last about an hour.
