Case: ___________________________ Age of child: _______________

For your case, please provide the following:

(a) Brief summary of the case

(b) The likely diagnoses and specific diagnoses to rule out

(c) The specific symptoms evidenced that support the diagnoses
(d) Other relevant information (such as family, developmental, and demographic information) that supports the diagnoses and a statement of how this information supports the diagnoses

(e) Information which seems to contradict or be atypical of the diagnoses and a statement of why this is

(f) A statement of what additional information you would want to know to verify your likely diagnoses and why
(g) A statement of what additional information you would want to rule out other specific diagnoses and why

(h) Some hypotheses regarding etiological and contributing factors regarding the disorder(s) and any evidence to support these hypotheses
