EDIT YOUR MONITOR/DISPLAY SETTINGS

1. Right-click in an open area of your Desktop and select “Properties” from the menu.

2. Go to the “Settings” tab, farthest to the right.

3. You can adjust your resolution (bigger numbers mean smaller text on-screen) or adjust dual monitor settings if you have a second monitor connected. If your computer is not correctly using your second monitor click on the picture of the monitor labeled as “2”, which is grayed out, and then check or uncheck (as appropriate) the “Extend my Windows desktop onto this monitor.” Option. Click “Apple” to see the results of this settings change.

Contact your USC, Audrey Sundkvist, via phone (ext. 6019) or email (asundkvi@willamette.edu) with any questions.
